Plant Height: 10 inches

Flower Height: 18 inches

Spread: 14 inches

Spacing: 12 inches

Sunlight: ○ ◐ ●

Hardiness Zone: 4a

Other Names: Coralbells, Alumroot

Description:

Dainty spikes of creamy bells rise from a large, dense mound of ginger foliage that matures to silvery rose with deep purple undersides; amazing color addition with great versatility; keep soil moist in heat of summer

Ornamental Features

Pinot Gris Coral Bells features dainty spikes of creamy white bell-shaped flowers rising above the foliage in mid spring, which emerge from distinctive pink flower buds. Its attractive large tomentose lobed leaves emerge chartreuse in spring, turning silver in color with curious deep purple undersides and tinges of rose the rest of the year.

Landscape Attributes

Pinot Gris Coral Bells is a dense herbaceous evergreen perennial with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It is a good choice for attracting hummingbirds to your yard. It has no significant negative characteristics.

Pinot Gris Coral Bells is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Pinot Gris Coral Bells will grow to be about 10 inches tall at maturity extending to 18 inches tall with the flowers, with a spread of 14 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant performs well in both full sun and full shade. However, you may want to keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider covering it with a thick layer of mulch in winter to protect it in exposed locations or colder microclimates. This is a selection of a native North American species. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Pinot Gris Coral Bells is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
