

Buffalo Juniper

Juniperus sabina 'Buffalo'

Height: 24 inches

Spread: 8 feet

Sunlight:

Hardiness Zone: 3b

This shrub should only be grown in full sunlight. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
