

**Raspberry Cream Twirl Rose***Rosa 'Meiterato'*

Height: 12 feet

Spread: 3 feet

Sunlight: 

Hardiness Zone: 5b

Group/Class: Climbing Rose

**Description:**

A vigorous climber that produces spectacular clusters of raspberry blooms that are streaked and swirled in white; perfect for garden walls and trellises; prune this variety after blooming; nearly thornless

**Ornamental Features**

Raspberry Cream Twirl Rose features showy lightly-scented double scarlet flowers with pink overtones and white streaks along the branches from late spring to late summer. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

**Landscape Attributes**

Raspberry Cream Twirl Rose is a multi-stemmed deciduous woody vine with a twining and trailing habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This woody vine will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting bees and butterflies to your yard. It has no significant negative characteristics.

Raspberry Cream Twirl Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

Raspberry Cream Twirl Rose will grow to be about 12 feet tall at maturity, with a spread of 3 feet. As a climbing rose, it can be leggy near the base and may be concealed by underplanting with lower-growing facer plants. It should be planted near a fence, trellis or other landscape structure where it can be trained to grow upwards on it, or allowed to trail off a retaining wall or slope. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This woody vine should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
