Height: 5 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 5a

Group/Class: Hybrid Tea Rose

Description:

These sunny yellow blooms emerge from dark, golden orange buds and are carried on sturdy stems; foliage is dark green, semi-glossy and has superior disease resistance; an excellent cut flower

Ornamental Features

Sunny Sky Rose features showy fragrant double yellow flowers at the ends of the branches from late spring to mid fall, which emerge from distinctive orange flower buds. The flowers are excellent for cutting. It has green deciduous foliage. The glossy oval compound leaves turn yellow in fall.

Landscape Attributes

Sunny Sky Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. It has no significant negative characteristics.

Sunny Sky Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Sunny Sky Rose will grow to be about 5 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
