Height: 24 inches

Spread: 24 inches

Sunlight: ◐ ●

Hardiness Zone: 5b

Other Names: Doghobble, Dog Hobble

Description:

Grown primarily for its amazing, glossy green and burgundy foliage; this compact shrub has small clusters of urn-shaped white flowers and arching stems that add to its beauty; best in part-shade; water in extreme heat

Ornamental Features

Keiskei Fetterbush has attractive dark green foliage with red undersides which emerges burgundy in spring on a plant with an arching habit of growth. The glossy narrow leaves are highly ornamental and turn an outstanding burgundy in the fall, which persists throughout the winter. It is blanketed in stunning racemes of white flowers along the branches in mid summer.

Landscape Attributes

Keiskei Fetterbush is a multi-stemmed evergreen shrub with a shapely form and gracefully arching branches. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and is best pruned in late winter once the threat of extreme cold has passed. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease

Keiskei Fetterbush is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover
- Naturalizing And Woodland Gardens
- Container Planting

Planting & Growing

Keiskei Fetterbush will grow to be about 24 inches tall at maturity, with a spread of 24 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in partial shade to shade. It is quite adaptable, prefering to grow in average to wet conditions, and will even tolerate some standing water. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. This species is not originally from North America.

Keiskei Fetterbush makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
